On November 2, 2015, Great Plains Energy Incorporated had 154,369,354 shares of common stock outstanding. On November 2, 2015, Kansas City Power & Light Company had one share of common stock outstanding and held by Great Plains Energy Incorporated.

Kansas City Power & Light Company

Yes _

No X

Kansas City Power & Light Company meets the conditions set forth in General Instruction (H)(1)(a) and (b) of Form 10-Q and is therefore filing this Form 10-Q with the reduced disclosure format.

Yes

No X

Great Plains Energy Incorporated

This combined Quarterly Report on Form 10-Q is being filed by Great Plains Energy Incorporated (Great Plains Energy) and Kansas City Power & Light Company (KCP&L). KCP&L is a wholly owned subsidiary of Great Plains Energy and represents a significant portion of its assets, liabilities, revenues, expenses and operations. Thus, all information contained in this report relates to, and is filed by, Great Plains Energy. Information that is specifically identified in this report as relating solely to Great Plains Energy, such as its financial statements and all information relating to Great Plains Energy's other operations, businesses and subsidiaries, including KCP&L Greater Missouri Operations Company (GMO), does not relate to, and is not filed by, KCP&L. KCP&L makes no representation as to that information. Neither Great Plains Energy nor its other subsidiaries have any obligation in respect of KCP&L's debt securities and holders of such securities should not consider Great Plains Energy's or its other subsidiaries' financial resources or results of operations in making a decision with respect to KCP&L's debt securities. Similarly, KCP&L has no obligation in respect of securities of Great Plains Energy or its other subsidiaries.

This report should be read in its entirety. No one section of the report deals with all aspects of the subject matter. It should be read in conjunction with the consolidated financial statements and related notes and with the management's discussion and analysis included in the 2014 Form 10-K for each of Great Plains Energy and KCP&L.

CAUTIONARY STATEMENTS REGARDING CERTAIN FORWARD-LOOKING INFORMATION

Statements made in this report that are not based on historical facts are forward-looking, may involve risks and uncertainties, and are intended to be as of the date when made. Forward-looking statements include, but are not limited to, the outcome of regulatory proceedings, cost estimates of capital projects and other matters affecting future operations. In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, Great Plains Energy and KCP&L are providing a number of important factors that could cause actual results to differ materially from the provided forward-looking information. These important factors include: future economic conditions in regional, national and international markets and their effects on sales, prices and costs; prices and availability of electricity in regional and national wholesale markets; market perception of the energy industry, Great Plains Energy and KCP&L; changes in business strategy, operations or development plans; the outcome of contract negotiations for goods and services; effects of current or proposed state and federal legislative and regulatory actions or developments, including, but not limited to, deregulation, re-regulation and restructuring of the electric utility industry; decisions of regulators regarding rates the Companies can charge for electricity; adverse changes in applicable laws, regulations, rules, principles or practices governing tax, accounting and environmental matters including, but not limited to, air and water quality; financial market conditions and performance including, but not limited to, changes in interest rates and credit spreads and in availability and cost of capital and the effects on nuclear decommissioning trust and pension plan assets and costs; impairments of long-lived assets or goodwill; credit ratings; inflation rates; effectiveness of risk management policies and procedures and the ability of counterparties to satisfy their contractual commitments; impact of terrorist acts, including, but not limited to, cyber terrorism; ability to carry out marketing and sales plans; weather conditions including, but not limited to, weather-related damage and their effects on sales, prices and costs; cost, availability, quality and deliverability of fuel; the inherent uncertainties in estimating the effects of weather, economic conditions and other factors on customer consumption and financial results; ability to achieve generation goals and the occurrence and duration of planned and unplanned generation outages; delays in the anticipated in-service dates and cost increases of generation, transmission, distribution or other projects; Great Plains Energy's ability to successfully manage transmission joint venture; the inherent risks associated with the ownership and operation of a nuclear facility including, but not limited to, environmental, health, safety, regulatory and financial risks; workforce risks, including, but not limited to, increased costs of retirement, health care and other benefits; and other risks and uncertainties.

This list of factors is not all-inclusive because it is not possible to predict all factors. Part II Item 1A Risk Factors included in this report, together with the risk factors included in the 2014 Form 10-K for each of Great Plains Energy and KCP&L under Part I Item 1A, should be carefully read for further understanding of potential risks for each of Great Plains Energy and KCP&L. Other sections of this report and other periodic reports filed by each of Great Plains Energy and KCP&L with the Securities and Exchange Commission (SEC) should also be read for more information regarding risk factors. Each forward-looking statement speaks only as of the date of the particular statement. Great Plains Energy and KCP&L undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

GREAT PLAINS ENERGY INCORPORATED KANSAS CITY POWER & LIGHT COMPANY

Notes to Unaudited Consolidated Financial Statements

The notes to unaudited consolidated financial statements that follow are a combined presentation for Great Plains Energy Incorporated and Kansas City Power & Light Company, both registrants under this filing. The terms "Great Plains Energy," "Company," "KCP&L" and "Companies" are used throughout this report. "Great Plains Energy" and the "Company" refer to Great Plains Energy Incorporated and its consolidated subsidiaries, unless otherwise indicated. "KCP&L" refers to Kansas City Power & Light Company and its consolidated subsidiaries. "Companies" refers to Great Plains Energy Incorporated and its consolidated subsidiaries and KCP&L and its consolidated subsidiaries. The Companies' interim financial statements reflect all adjustments (which include normal, recurring adjustments) that are necessary, in the opinion of management, for a fair presentation of the results for the interim periods presented.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization

Great Plains Energy, a Missouri corporation incorporated in 2001, is a public utility holding company and does not own or operate any significant assets other than the stock of its subsidiaries. Great Plains Energy's wholly owned direct subsidiaries with significant operations are as follows:

- KCP&L is an integrated, regulated electric utility that provides electricity to customers primarily in the states of Missouri and Kansas. KCP&L has one active wholly owned subsidiary, Kansas City Power & Light Receivables Company (KCP&L Receivables Company).
- KCP&L Greater Missouri Operations Company (GMO) is an integrated, regulated electric utility that provides electricity to customers in the state of Missouri. GMO also provides regulated steam service to certain customers in the St. Joseph, Missouri area. GMO has two active wholly owned subsidiaries, GMO Receivables Company and MPS Merchant Services, Inc. (MPS Merchant). MPS Merchant has certain long-term natural gas contracts remaining from its former non-regulated trading operations.

Great Plains Energy also wholly owns GPE Transmission Holding Company, LLC (GPETHC). GPETHC owns 13.5% of Transource Energy, LLC (Transource) with the remaining 86.5% owned by AEP Transmission Holding Company, LLC (AEPTHC), a subsidiary of American Electric Power Company, Inc. GPETHC accounts for its investment in Transource under the equity method. Transource is focused on the development of competitive electric transmission projects.

Each of Great Plains Energy's and KCP&L's consolidated financial statements includes the accounts of their subsidiaries. Intercompany transactions have been eliminated.

Great Plains Energy's sole reportable business segment is electric utility. See Note 19 for additional information.

Basic and Diluted Earnings per Common Share Calculation

To determine basic earnings per common share (EPS), preferred stock dividend requirements are deducted from net income before dividing by the average number of common shares outstanding. The effect of dilutive securities, calculated using the treasury stock method, assumes the issuance of common shares applicable to performance shares and restricted stock.

The following table reconciles Great Plains Energy's basic and diluted EPS.

		Three Mo Septe	Year to Date September 30					
		2015	2014		2015		2014	
Income								
Net income	\$	126.8	\$ 147.4	\$	190.1	\$	223.3	
Less: preferred stock dividend requirements		0.4	0.4		1.2		1.2	
Earnings available for common shareholders	\$	126.4	\$ 147.0	\$	188.9	\$	222.1	
Common Shares Outstanding								
Average number of common shares outstanding		154.2	153.9		154.1		153.8	
Add: effect of dilutive securities		0.6	0.4		0.7		0.4	
Diluted average number of common shares outstanding		154.8	154.3		154.8		154.2	
Basic EPS	\$	0.82	\$ 0.96	\$	1.23	\$	1.44	
Diluted EPS	\$	0.82	\$ 0.95	\$	1.22	\$	1.44	

Anti-dilutive shares excluded from the computation of diluted EPS are detailed in the following table.

	Three Mont Septeml		Year to Septem	
	2015	2014	2015	2014
Performance shares		108,832	_	108,832
Restricted stock shares	_	73,671	_	71,860

Dividends Declared

In November 2015, Great Plains Energy's Board of Directors (Board) declared a quarterly dividend of \$0.2625 per share on Great Plains Energy's common stock. The common dividend is payable December 21, 2015, to shareholders of record as of November 30, 2015. The Board also declared regular dividends on Great Plains Energy's preferred stock, payable March 1, 2016, to shareholders of record as of February 8, 2016.

New Accounting Standards

In May 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in Generally Accepted Accounting Principles (GAAP) when it becomes effective. In August 2015, the FASB issued ASU No. 2015-14, deferring the effective date of ASU No. 2014-09 one year, from January 1, 2017, to January 1, 2018. The Companies plan to adopt ASU No. 2014-09 on January 1, 2018. The standard permits the use of either the retrospective or cumulative effect transition method. The Companies are evaluating the effect that ASU No. 2014-09 will have on their consolidated financial statements and related disclosures and have not yet selected a transition method nor have they determined the effect of the standard on their ongoing financial reporting.

In April 2015, the FASB issued ASU No. 2015-03, *Simplifying the Presentation of Debt Issuance Costs*, which requires that debt issuance costs related to a recognized debt liability be presented on the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Great Plains Energy and KCP&L currently include debt issuance costs in Other - Investments and Other Assets on their consolidated balance sheets. The new guidance is to be applied retrospectively and is effective for interim and annual periods beginning after December 15, 2015, with early adoption permitted. The Companies intend to early adopt ASU No. 2015-03 for the 2015 Form 10-K.

3. RECEIVABLES

Great Plains Energy's and KCP&L's receivables are detailed in the following table.

	Sep	tember 30	De	cember 31		
		2015				
Great Plains Energy		ions))			
Customer accounts receivable - billed	\$	28.1	\$	1.1		
Customer accounts receivable - unbilled		81.4		75.3		
Allowance for doubtful accounts - customer accounts receivable		(4.1)		(2.8)		
Other receivables		68.0		86.7		
Total	\$	173.4	\$	160.3		
KCP&L						
Customer accounts receivable - billed	\$	27.6	\$	0.6		
Customer accounts receivable - unbilled		59.3		49.7		
Allowance for doubtful accounts - customer accounts receivable		(1.9)		(1.2)		
Other receivables		61.8		79.8		
Total	\$	146.8	\$	128.9		

Great Plains Energy's and KCP&L's other receivables at September 30, 2015, and December 31, 2014, consisted primarily of receivables from partners in jointly owned electric utility plants and wholesale sales receivables.

Sale of Accounts Receivable - KCP&L and GMO

KCP&L and GMO sell all of their retail electric accounts receivable to their wholly owned subsidiaries, KCP&L Receivables Company and GMO Receivables Company, respectively, which in turn sell an undivided percentage ownership interest in the accounts receivable to Victory Receivables Corporation, an independent outside investor. Each of KCP&L Receivables Company's and GMO Receivables Company's sale of the undivided percentage ownership interest in accounts receivable to Victory Receivables Corporation is accounted for as a secured borrowing with accounts receivable pledged as collateral and a corresponding short-term collateralized note payable recognized on the balance sheets. At September 30, 2015, and December 31, 2014, Great Plains Energy's accounts receivable pledged as collateral and the corresponding short-term collateralized note payable were \$190.0 million and \$171.0 million, respectively. At September 30, 2015, and December 31, 2014, KCP&L's accounts receivable pledged as collateral and the corresponding short-term collateralized note payable were \$110.0 million.

KCP&L and GMO each sell their receivables at a fixed price based upon the expected cost of funds and charge-offs. These costs comprise KCP&L's and GMO's loss on the sale of accounts receivable. KCP&L and GMO service the receivables and each receive an annual servicing fee of 1.5% of the outstanding principal amount of the receivables sold to KCP&L Receivables Company and GMO Receivables Company. KCP&L and GMO do not recognize a servicing asset or liability because management determined the collection agent fees earned by KCP&L and GMO approximate market value. KCP&L's agreement expires in September 2016 and allows for \$110 million in aggregate outstanding principal amount at any time. GMO's agreement expires in September 2016 and allows for \$65 million in aggregate outstanding principal from mid-November through mid-June and then increases to \$80 million from mid-June through mid-November.

Information regarding KCP&L's sale of accounts receivable to KCP&L Receivables Company and GMO's sale of accounts receivable to GMO Receivables Company is reflected in the following tables.

⁽a) Any net gain (loss) is the result of the timing difference inherent in collecting receivables and over the life of the agreement will net to zero.

4. NUCLEAR PLANT

KCP&L owns 47% of Wolf Creek Generating Station (Wolf Creek), its only nuclear generating unit. Wolf Creek is located in Coffey County, Kansas, just northeast of Burlington, Kansas. Wolf Creek's operating license expires in 2045. Wolf Creek is regulated by the Nuclear Regulatory Commission (NRC), with respect to licensing, operations and safety-related requirements.

Spent Nuclear Fuel and High-Level Radioactive Waste

Under the Nuclear Waste Policy Act of 1982, the Department of Energy (DOE) is responsible for the permanent disposal of spent nuclear fuel. Wolf Creek paid the DOE a quarterly fee of one-tenth of a cent for each kilowatt hour (kWh) of net nuclear generation delivered and sold for the future disposal of spent nuclear fuel. KCP&L's 47% share of these costs were charged to fuel expense. The Nuclear Energy Institute, a number of individual utilities, and the National Association of Regulatory Utility Commissioners sued the DOE seeking the suspension of this fee. In January 2014, the DOE submitted a proposal to Congress to set the fee at zero, which became effective on May 16, 2014.

In 2010, the DOE filed a motion with the NRC to withdraw its then pending application to the NRC to construct a national repository for the disposal of spent nuclear fuel and high-level radioactive waste at Yucca Mountain, Nevada. An NRC board denied the DOE's motion to withdraw its application. In 2011, the NRC reexamined its decision and ordered the licensing board, consistent with budgetary limitations, to close out its work on the DOE's application. In August 2013, a federal court of appeals ruled that the NRC must resume its review of the DOE's application.

Wolf Creek is currently evaluating alternatives for expanding its existing on-site spent nuclear fuel storage to provide additional capacity prior to 2025. Management cannot predict when, or if, an off-site storage site or alternative disposal site will be available to receive Wolf Creek's spent nuclear fuel and will continue to monitor this activity.

Low-Level Radioactive Waste

Wolf Creek disposes of most of its low-level radioactive waste (Class A waste) at an existing third-party repository in Utah. Management expects that the site located in Utah will remain available to Wolf Creek for disposal of its Class A waste. Wolf Creek has contracted with a waste processor that will process, take title and dispose in another state most of the remainder of Wolf Creek's low-level radioactive waste (Classes B and C waste, which is higher in radioactivity but much lower in volume). Should on-site waste storage be needed in the future, Wolf Creek has current storage capacity on site for about four years' generation of Classes B and C waste and believes it will be able to expand that storage capacity as needed if it becomes necessary to do so.

Nuclear Decommissioning Trust Fund

The following table summarizes the change in Great Plains Energy's and KCP&L's nuclear decommissioning trust fund.

	Sep	September 30 2015					
Decommissioning Trust		(mill	illions)				
Beginning balance January 1	\$	199.0	\$	183.9			
Contributions		2.5		3.3			
Earned income, net of fees		2.4		3.6			
Net realized gains		0.9		0.4			
Net unrealized gains (losses)		(11.7)		7.8			
Ending balance	\$	193.1	\$	199.0			

The nuclear decommissioning trust is reported at fair value on the balance sheets and is invested in assets as detailed in the following table.

		Septemb	er 30, 20)15			December 31, 2014								
	Cost Basis	 Unrealized Gains		Unrealized Losses		Fair Value		Cost Basis		realized Gains	_	ealized osses		Fair Value	
						(mi	llions)								
Equity securities	\$ 89.4	\$ 42.2	\$	(3.2)	\$	128.4	\$	87.2	\$	50.6	\$	(0.7)	\$	137.1	
Debt securities	59.0	3.2		(0.3)		61.9		55.4		3.8		(0.1)		59.1	
Other	2.8	_		_		2.8		2.8		_		_		2.8	
Total	\$ 151.2	\$ 45.4	\$	(3.5)	\$	193.1	\$	145.4	\$	54.4	\$	(0.8)	\$	199.0	

The weighted average maturity of debt securities held by the trust at September 30, 2015, was approximately 7 years. The costs of securities sold are determined on the basis of specific identification. The following table summarizes the realized gains and losses from the sale of securities in the nuclear decommissioning trust fund.

		Three Months Ended September 30			Year to Date September 30			
	2	2015		2014	2015			2014
				(mil	lions)			
Realized gains	\$	0.6	\$	0.3	\$	3.2	\$	1.0
Realized losses		(0.5)		(0.1)		(2.3)		(0.7)

5. REGULATORY MATTERS

KCP&L Kansas Rate Case Proceedings

In January 2015, KCP&L filed an application with The State Corporation Commission of the State of Kansas (KCC) to request an increase to its retail revenues of \$67.3 million, with a return on equity of 10.3% and a rate-making equity ratio of 50.48%. The request included costs to install environmental upgrades at the La Cygne Station, upgrades at Wolf Creek and other infrastructure and system improvements made to be able to provide reliable electric service.

In September 2015, KCC issued an order for KCP&L authorizing an increase in annual revenues of \$48.7 million, a return on equity of 9.3% and a rate-making equity ratio of 50.48%. The rates established by the order took effect on October 1, 2015, and are effective unless and until modified by KCC or stayed by a court.

KCP&L Missouri Rate Case Proceedings

In October 2014, KCP&L filed an application with the Public Service Commission of the State of Missouri (MPSC) to request an increase to its retail revenues of \$120.9 million (subsequently adjusted to \$112.7 million), with a return on equity of 10.3% and a rate-making equity ratio of 50.36%. The request included recovery of increased transmission and property tax expenses, costs to install environmental upgrades at the La Cygne Station, upgrades at Wolf Creek and other infrastructure and system improvements made to be able to provide reliable electric service. KCP&L also requested authorization to implement a Fuel Adjustment Clause (FAC).

In September 2015, the MPSC issued an order for KCP&L authorizing an increase in annual revenues of \$89.7 million, a return on equity of 9.5% and a rate-making equity ratio of approximately 50.09%. The MPSC also approved KCP&L's request to implement a FAC. The rates established by the order took effect on September 29, 2015, and are effective unless and until modified by the MPSC or stayed by a court. Notices of Appeal of the September 2015 MPSC order were filed with the Missouri Court of Appeals, Western District, by KCP&L in October 2015 and by The Office of the Public Counsel in November 2015 regarding various issues.

6. GOODWILL

Accounting rules require goodwill to be tested for impairment annually and when an event occurs indicating the possibility that an impairment exists. The annual impairment test for the \$169.0 million of GMO acquisition goodwill was conducted on September 1, 2015. The goodwill impairment test is a two step process. The first step compares the fair value of a reporting unit to its carrying amount, including goodwill, to identify potential impairment. If the carrying amount exceeds the fair value of the reporting unit, the second step of the test is performed, consisting of assignment of the reporting unit's fair value to its assets and liabilities to determine an implied fair value of goodwill, which is compared to the carrying amount of goodwill to determine the impairment loss, if any, to be recognized in the financial statements. Great Plains Energy's regulated electric utility operations are considered one reporting unit for assessment of impairment, as they are included within the same operating segment and have similar economic characteristics. The determination of fair value of the reporting unit consisted of two valuation techniques: an income approach consisting of a discounted cash flow analysis and a market approach consisting of a determination of reporting unit invested capital using market multiples derived from the historical revenue, EBITDA, net utility asset values and market prices of stock of peer companies. The results of the two techniques were evaluated and weighted to determine a point within the range that management considered representative of fair value for the reporting unit. Fair value of the reporting unit exceeded the carrying amount, including goodwill; therefore, there was no impairment of goodwill.

7. ASSET RETIREMENT OBLIGATIONS

Asset retirement obligations (AROs) associated with tangible long-lived assets are legal obligations that exist under enacted laws, statutes and written or oral contracts, including obligations arising under the doctrine of promissory estoppel. These liabilities are recognized at estimated fair value as incurred with a corresponding amount capitalized as part of the cost of the related long-lived assets and depreciated over their useful lives. Accretion of the liabilities due to the passage of time is recorded to a regulatory asset and/or liability. Changes in the estimated fair values of the liabilities are recognized when known.

KCP&L has AROs related to decommissioning Wolf Creek, site remediation of its Spearville Wind Energy Facilities, asbestos abatement, removal of storage tanks and closure and post-closure of ponds and landfills containing coal combustion residuals (CCRs). GMO has AROs related to asbestos abatement, removal of storage tanks and closure and post-closure of ponds and landfills containing CCRs.

Additionally, certain wiring used in Great Plains Energy's and KCP&L's generating stations include asbestos insulation, which would require special handling if disturbed. Due to the inability to reasonably estimate the quantities or the amount of disturbance that will be necessary during dismantlement at the end of the life of a plant, the fair value of this ARO cannot be reasonably estimated at this time. Management will continue to monitor the obligation and will recognize a liability in the period in which sufficient information becomes available to reasonably estimate its fair value.

On April 17, 2015, the Environmental Protection Agency (EPA) published new regulations to regulate the disposal of CCRs at electric generating facilities. See Note 12 under the heading Solid Waste for additional information regarding the CCR rule. The CCR rule represents legal obligations of Great Plains Energy and KCP&L as to the closure and post-closure of its ponds and landfills containing CCRs. As a result of the CCR rule, Great Plains Energy and KCP&L increased their AROs \$69.5 million and \$51.3 million, respectively, in the second quarter of 2015.

The following table summarizes the change in Great Plains Energy's and KCP&L's AROs.

		Great Plains Energy				KCP&L				
	Sep	September 30 2015		December 31 2014		September 30 2015		September 30		ember 31
								2014		
				(mil	lions)					
Beginning balance	\$	195.9	\$	158.8	\$	177.7	\$	141.7

Revision in timing and/or estimates		15.0		26.8		16.7		26.8		
Accretion		9.4		10.3		8.5		9.2		
Ending balance	\$	274.8	\$	195.9	\$	237.5	\$	177.7		

8. PENSION PLANS AND OTHER EMPLOYEE BENEFITS

Great Plains Energy maintains defined benefit pension plans for substantially all active and inactive employees, including officers, of KCP&L and GMO, and its 47% ownership share of Wolf Creek Nuclear Operating Corporation (WCNOC) defined benefit plans. For the majority of employees, pension benefits under these plans reflect the employees' compensation, years of service and age at retirement; however, for union employees hired after October 1, 2013, the benefits are derived from a cash balance account formula. Effective in 2014, the KCP&L non-union plan was closed to future employees. Great Plains Energy also provides certain post-retirement health care and life insurance benefits for substantially all retired employees of KCP&L, GMO and its 47% ownership share of WCNOC.

KCP&L and GMO record pension and post-retirement expense in accordance with rate orders from the MPSC and KCC that allow the difference between pension and post-retirement costs under GAAP and costs for ratemaking to be recognized as a regulatory asset or liability. This difference between financial and regulatory accounting methods is due to timing and will be eliminated over the life of the plans.

The following tables provide Great Plains Energy's components of net periodic benefit costs prior to the effects of capitalization and sharing with joint owners of power plants.

		Pension	Bene	fits	Other Benefits			its
Three Months Ended September 30		2015		2014		2015		2014
Components of net periodic benefit costs				(mil	lions)			
Service cost	\$	11.4	\$	9.1	\$	0.8	\$	0.9
Interest cost		12.5		12.7		1.7		2.0
Expected return on plan assets		(13.0)		(12.7)		(0.7)		(0.7)
Prior service cost		0.2		0.2		0.7		0.8

Regulatory adjustment	(9.3)		(1.4)		4.2		3.3
Net periodic benefit costs	\$ 62.7	\$	63.6	\$	12.2	\$	12.4

Year to date September 30, 2015, Great Plains Energy contributed \$29.5 million to the pension plans and expects to contribute an additional \$49.4 million in 2015 to satisfy the minimum Employee Retirement Income Security Act of 1974, as amended (ERISA) funding requirements and the MPSC and KCC rate orders, the majority of which is expected to be paid by KCP&L. Also in 2015, Great Plains Energy expects to make contributions of \$10.2 million to the post-retirement benefit plans, the majority of which is expected to be paid by KCP&L.

9. EQUITY COMPENSATION

Great Plains Energy's Long-Term Incentive Plan is an equity compensation plan approved by Great Plains Energy's shareholders. The Long-Term Incentive Plan permits the grant of restricted stock, restricted stock units, bonus shares, stock options, stock appreciation rights, limited stock appreciation rights, director shares, director deferred share units and performance shares to directors, officers and other employees of Great Plains Energy and KCP&L. Forfeiture rates are based on historical forfeitures and future expectations and are reevaluated annually.

The following table summarizes Great Plains Energy's and KCP&L's equity compensation expense and the associated income tax benefit.

		Three Months Ended September 30				Year to Da September			
	2	2015 2014		2015		2	2014		
Great Plains Energy		(millions)							
Equity compensation expense	\$	3.7	\$	1.0	\$	4.6	\$	6.4	
Income tax benefit		1.4		0.3		1.7		2.3	
KCP&L									
Equity compensation expense	\$	2.5	\$	0.6	\$	3.1	\$	4.4	
Income tax benefit		0.9		0.1		1.1		1.5	

Performance Shares

Performance share activity year to date September 30, 2015, is summarized in the following table. Performance adjustment represents the number of shares of common stock issued related to performance shares and can vary from the number of performance shares initially granted depending on Great Plains Energy's performance over a stated period of time.

	Performance Shares	Grant Date Fair Value*		
Beginning balance January 1, 2015	534,016	\$ 25.11		
Granted	232,838	24.03		
Earned	(25,844)	19.48		
Forfeited	(46,927)	25.68		
Performance adjustment	(77,515)	19.48		
Ending balance September 30, 2015	616,568	25.60		

^{*} weighted-average

At September 30, 2015, the remaining weighted-average contractual term was 1.3 years. The weighted-average grant-date fair value of shares granted was \$22.46 and \$24.03 for the three months ended and year to date September 30, 2015, respectively. The weighted-average grant-date fair value of shares granted was \$28.78 for the three months ended and year to date September 30, 2014. At September 30, 2015, there was \$7.8 million of total unrecognized compensation expense, net of forfeiture rates, related to performance shares granted under the Long-Term Incentive Plan, which will be recognized over the remaining weighted-average contractual term. The total fair value of performance shares earned and paid was \$0.5 million and \$2.8 million year to date September 30, 2015, and 2014, respectively.

The fair value of performance share awards is estimated using the market value of the Company's stock at the valuation date and a Monte Carlo simulation technique that incorporates assumptions for inputs of expected volatilities, dividend yield and risk-free rates. Expected volatility is based on daily stock price change during a historical period commensurate with the remaining term of the performance period of the grant. The risk-free rate is based upon the rate at the time of the evaluation for zero-coupon government bonds with a maturity consistent with the remaining performance period of the grant. The dividend yield is based on the most recent dividends paid

and the actual closing stock price on the valuation date. For shares granted in 2015, inputs for expected volatility, dividend yield and risk-free rates ranged from 16%-17%, 3.72%-4.03% and 0.86%-1.02%, respectively.

Restricted Stock

Restricted stock activity year to date September 30, 2015, is summarized in the following table.

	Nonvested Restricted Stock	Grant I Fair Va		
Beginning balance January 1, 2015	267,390	\$	22.31	
Granted and issued	91,880		25.88	
Vested	(109,246)		19.68	
Forfeited	(15,644)		24.81	
Ending balance September 30, 2015	234,380		24.76	

^{*} weighted-average

At September 30, 2015, the remaining weighted-average contractual term was 1.5 years. The weighted-average grant-date fair value of shares granted was \$24.20 and \$25.88 for the three months ended and year to date September 30, 2015, respectively. The weighted-average grant-date fair value of shares granted was \$25.10 and \$25.69 for the three months ended and year to date September 30, 2014, respectively. At September 30, 2015, there was \$2.9 million of total unrecognized compensation expense, net of forfeiture rates, related to nonvested restricted stock granted under the Long-Term Incentive Plan, which will be recognized over the remaining weighted-average contractual term. The total fair value of shares vested was \$0.1 million and \$2.1 million for the three months ended and year to date September 30, 2015, respectively. The total fair value of shares vested was \$0.5 million and \$1.9 million for the three months ended and year to date September 30, 2014, respectively.

10. SHORT-TERM BORROWINGS AND SHORT-TERM BANK LINES OF CREDIT

Great Plains Energy's \$200 Million Revolving Credit Facility

Great Plains Energy's \$200 million revolving credit facility with a group of banks expires in October 2019. The facility's terms permit transfers of unused commitments between this facility and the KCP&L and GMO facilities discussed below, with the total amount of the facility not exceeding \$400 million at any one time. A default by Great Plains Energy or any of its significant subsidiaries on other indebtedness totaling more than \$50.0 million is a default under the facility. Under the terms of this facility, Great Plains Energy is required to maintain a consolidated indebtedness to consolidated capitalization ratio, as defined in the facility, not greater than 0.65 to 1.00 at all times. At September 30, 2015, Great Plains Energy was in compliance with this covenant. At September 30, 2015, Great Plains Energy had \$12.0 million of outstanding cash borrowings at a weighted-average interest rate of 1.75% and had issued \$0.2 million in letters of credit under the credit facility. At December 31, 2014, Great Plains Energy had \$4.0 million of outstanding cash borrowings at a weighted-average interest rate of 1.69% and had issued no letters of credit under the credit facility.

KCP&L's \$600 Million Revolving Credit Facility and Commercial Paper

KCP&L's \$600 million revolving credit facility with a group of banks provides support for its issuance of commercial paper and other general corporate purposes and expires in October 2019. Great Plains Energy and KCP&L may transfer up to \$200 million of unused commitments between Great Plains Energy's and KCP&L's facilities. A default by KCP&L on other indebtedness totaling more than \$50.0 million is a default under the facility. Under the terms of this facility, KCP&L is required to maintain a consolidated indebtedness to consolidated capitalization ratio, as defined in the facility, not greater than 0.65 to 1.00 at all times. At September 30, 2015, KCP&L was in compliance with this covenant. At September 30, 2015, KCP&L had \$82.1 million of commercial paper outstanding at a weighted-average interest rate of 0.43%, had issued letters of credit totaling \$2.7 million and had no outstanding at a weighted-average interest rate of 0.48%, had issued letters of credit totaling \$2.7 million and had no outstanding at a weighted-average interest rate of 0.48%, had issued letters of credit totaling \$2.7 million and had no outstanding cash borrowings under the credit facility.

GMO's \$450 Million Revolving Credit Facility and Commercial Paper

GMO's \$450 million revolving credit facility with a group of banks provides support for its issuance of commercial paper and other general corporate purposes and expires in October 2019. Great Plains Energy and GMO may transfer up to \$200 million of unused commitments between Great Plains Energy's and GMO's facilities. A default by GMO or any of its significant subsidiaries on other indebtedness totaling more than \$50.0 million is a default under the facility. Under the terms of this facility, GMO is required to maintain a consolidated indebtedness to consolidated capitalization ratio, as defined in the facility, not greater than 0.65 to 1.00 at all times. At September 30, 2015, GMO was in compliance with this covenant. At September 30, 2015, GMO had \$57.0 million of commercial paper outstanding at a weighted-average interest rate of 0.43%, had issued letters of credit totaling \$2.5 million and had no outstanding cash borrowings under the credit facility. At December 31, 2014, GMO had no commercial paper outstanding, had issued letters of credit totaling \$3.2 million and had no outstanding cash borrowings under the credit facility.

11. LONG-TERM DEBT

Great Plains Energy's and KCP&L's long-term debt is detailed in the following table.

		September 30	December 31		
	Year Due	2015	2014

Weighted-average interest rates at September 30, 2015

⁽b) Rate after amortizing gains/losses recognized in OCI on settlements of interest rate hedging instruments

⁽c) Variable rate

⁽d) Does not include \$50.0 million and \$21.9 million EIRR Series 2005 bonds because the bonds were repurchased in September 2015 and are held by KCP&L.

KCP&L General Mortgage Bonds

In March 2015, KCP&L repaid its \$14.0 million secured Series 2005 Environmental Improvement Revenue Refunding (EIRR) bonds at maturity.

In September 2015, KCP&L purchased in lieu of redemption its \$50.0 million and \$21.9 million secured EIRR Series 2005 bonds. As of September 30, 2015, the bonds were still outstanding, but were not reported as a liability on the balance sheet since they are being held by KCP&L. KCP&L has the ability to remarket these bonds to third parties whenever it determines market conditions are sufficiently attractive to do so.

KCP&L Senior Notes

In August 2015, KCP&L issued, at a discount, \$350.0 million of 3.65% unsecured Senior Notes, maturing in 2025.

12. COMMITMENTS AND CONTINGENCIES

Environmental Matters

Great Plains Energy and KCP&L are subject to extensive federal, state and local environmental laws, regulations and permit requirements relating to air and water quality, waste management and disposal, natural resources and health and safety. In addition to imposing continuing compliance obligations and remediation costs, these laws, regulations and permits authorize the imposition of substantial penalties for noncompliance, including fines, injunctive relief and other sanctions. The cost of complying with current and future environmental requirements is expected to be material to Great Plains Energy and KCP&L. Failure to comply with environmental requirements or to timely recover environmental costs through rates could have a material effect on Great Plains Energy's and KCP&L's results of operations, financial position and cash flows.

Great Plains Energy's and KCP&L's current estimates of capital expenditures (exclusive of Allowance for Funds Used During Construction (AFUDC) and property taxes) over the next five years to comply with environmental regulations are in the following table. The total cost of compliance with any existing, proposed or future laws and regulations may be significantly different from these cost estimates provided.

	2015	2016	2017	2018	2019
			(millions)		
Great Plains Energy	\$ 119.1 \$	62.2	\$ 158.4	\$ 103.4 \$	99.9
KCP&L	104.5	51.5	132.9	86.9	84.3

The Companies expect to seek recovery of the costs associated with environmental requirements through rate increases; however, there can be no assurance that such rate increases would be granted. The Companies may be subject to materially adverse rate treatment in response to competitive, economic, political, legislative or regulatory factors and/or public perception of the Companies' environmental reputation.

The following discussion groups environmental and certain associated matters into the broad categories of air and climate change, water, solid waste and remediation.

Clean Air Act and Climate Change Overview

The Clean Air Act and associated regulations enacted by the EPA form a comprehensive program to preserve and enhance air quality. States are required to establish regulations and programs to address all requirements of the Clean Air Act and have the flexibility to enact more stringent requirements. All of Great Plains Energy's and KCP&L's generating facilities, and certain of their other facilities, are subject to the Clean Air Act.

Best Available Retrofit Technology (BART) Rule

The EPA BART rule directs state air quality agencies to identify whether visibility-reducing emissions from sources subject to BART are below limits set by the state or whether retrofit measures are needed to reduce emissions. BART applies to specific eligible facilities including KCP&L's La Cygne Nos. 1 and 2 in Kansas; KCP&L's Iatan No. 1, in which GMO has an 18% interest, and KCP&L's Montrose No. 3 in

Missouri; GMO's Sibley Unit No. 3 and Lake Road Unit No. 6 in Missouri; and Westar Energy, Inc.'s (Westar) Jeffrey Unit Nos. 1 and 2 in Kansas, in which GMO has an 8% interest. Both Missouri and Kansas have approved BART plans.

KCP&L has a consent agreement with the Kansas Department of Health and Environment (KDHE) incorporating limits for stack particulate matter emissions, as well as limits for NO_x and SO_2 emissions, at its La Cygne Station that will be below the presumptive limits under BART. KCP&L further agreed to use its best efforts to install emission control technologies to reduce those emissions from the La Cygne Station prior to the required compliance date under BART, but in no event later than June 1, 2015. In August 2011, KCC issued its order on KCP&L's predetermination request that would apply to the recovery of costs for its 50% share of the environmental equipment required to comply with BART at the La Cygne Station. In the order, KCC stated that KCP&L's decision to retrofit La Cygne was reasonable, reliable, efficient and prudent and the \$1.23 billion cost estimate is reasonable. KCP&L expects the final cost of the project to be approximately \$75 million below the \$1.23 billion cost estimate. KCP&L's 50% share of the estimated cost is \$615 million. In September 2011, KCP&L commenced construction of the La Cygne Station project and at September 30, 2015, had incurred approximately \$531 million of cash capital expenditures. The remaining cash capital expenditures are included in the estimated capital expenditures table above. The environmental equipment was placed in-service at La Cygne No. 2 in March 2015 and at La Cygne No. 1 in April 2015.

Mercury and Air Toxics Standards (MATS) Rule

In December 2011, the EPA finalized the MATS Rule that will reduce emissions of toxic air pollutants, also known as hazardous air pollutants, from new and existing coal- and oil-fired electric utility generating units with a capacity of greater than 25 MWs. The rule establishes numerical emission limits for mercury, particulate matter (a surrogate for non-mercury metals) and hydrochloric acid (a surrogate for acid gases). The rule establishes work practices, instead of numerical emission limits, for organic air toxics, including dioxin/furan. MATS Rule compliance commenced at KCP&L's Iatan Station in April 2015 and will commence at KCP&L's La Cygne Station in December 2015. In June 2015, the U.S. Supreme Court reversed the judgment of the Court of Appeals for the D.C. Circuit, which had upheld the MATS Rule, and remanded the MATS Rule for further proceedings consistent with its opinion. The Supreme Court held that the EPA was required by the Clean Air Act, but had failed, to consider costs when the EPA made the initial decision that regulating air toxics was appropriate and necessary. KCP&L's and GMO's other affected coal-fired units will take actions to be compliant in April 2016, unless the D.C. Circuit Court issues an order which results in alternate compliance actions. Estimated capital costs to comply with the MATS Rule are included in the estimated capital expenditures table above.

Industrial Boiler Rule

In December 2012, the EPA issued a final rule that would reduce emissions of hazardous air pollutants from new and existing industrial boilers. The final rule establishes numeric emission limits for mercury, particulate matter (as a surrogate for non-mercury metals), hydrogen chloride (as a surrogate for acid gases) and carbon monoxide (as a surrogate for non-dioxin organic hazardous air pollutants). The final rule establishes emission limits for KCP&L's and GMO's existing units that produce steam other than for the generation of electricity. The final rule does not apply to KCP&L's and GMO's electricity generating boilers, but would apply to most of GMO's Lake Road boilers, which also serve steam customers, and to auxiliary boilers at other generating facilities. The rule became effective in January 2013 and allows three to four years for compliance. Estimated capital costs to comply with the Industrial Boiler Rule are included in the estimated capital expenditures table above.

SO₂ NAAQS

In June 2010, the EPA adopted a more stringent primary National Ambient Air Quality Standard (NAAQS) for SO₂ by establishing a new 1-hour standard at a level of 0.075 ppm and revoking the two existing primary standards of 0.140 ppm evaluated over 24 hours and 0.030 ppm evaluated over an entire year. In July 2013, the EPA designated a part of Jackson County, Missouri, which is in the Companies' service territory, as a nonattainment area for the new 1-hour SO₂ standard. The Missouri Department of Natural

Resources (MDNR) will now develop and submit their state implementation plan to the EPA to return the area to attainment of the standard, which may include stricter controls on certain industrial facilities. The Companies are unable to determine if there will be any financial and/or operational impacts until the state implementation plan is complete.

Climate Change

The Companies' current generation capacity is primarily coal-fired and is estimated to produce about one ton of CO₂ per MWh, or approximately 22 million tons and 17 million tons per year for Great Plains Energy and KCP&L, respectively. The Companies are subject to existing greenhouse gas reporting regulations and certain greenhouse gas permitting requirements. Federal or state legislation concerning the reduction of emissions of greenhouse gases, including CO₂, could be enacted in the future. At the international level, while the United States is not a current party to the international Kyoto Protocol, it has agreed to undertake certain voluntary actions under the non-binding Copenhagen Accord and pursuant to subsequent international discussions relating to climate change, including the establishment of a goal to reduce greenhouse gas emissions. International agreements legally binding on the United States may be reached in the future. Greenhouse gas legislation has the potential of having significant financial and operational impacts on Great Plains Energy and KCP&L; however, the ultimate financial and operational consequences to Great Plains Energy and KCP&L cannot be determined until such legislation is passed. In the absence of new Congressional mandates, the EPA is proceeding with the regulation of greenhouse gases under the existing Clean Air Act.

In August 2015, the EPA finalized CO₂ emission standards for new, modified and reconstructed affected fossil-fuel-fired electric utility generating units. The standards would not apply to Great Plains Energy's and KCP&L's existing units unless the units were modified or reconstructed in the future.

In August 2015, the EPA finalized its Clean Power Plan which sets CO₂ emission performance rates for existing affected fossil fuelfired electric generating units. Specifically, the EPA translated those performance rates into a state goal measured in mass and rate based on each state's generation mix. The states have the ability to develop their own plans for affected units to achieve either the performance rates directly or the state goals, with guidelines for the development, submittal and implementation of those plans. Nationwide, by 2030, the EPA projects the Clean Power Plan would achieve CO₂ emission reductions from the power sector of approximately 32% from CO₂ emission levels in 2005.

The EPA has finalized an interim CO₂ goal rate reduction in Kansas and Missouri (average of 2022-2029) of 34% and 26%, respectively, and 2030 targets in Kansas and Missouri of 44% and 37%, respectively. The baseline for these reductions is 2012 CO₂ emissions adjusted by the EPA. The EPA has also finalized mass based CO₂ reduction goals.

States are required to submit final plans to implement the Clean Power Plan or an extension request to the EPA by September 2016. States receiving an extension request must submit final plans by September 2018. An EPA plan with either a rate-based or mass-based trading program has yet to be finalized and can be enforced in states that fail to submit approved plans by the deadlines established in the final guidelines.

Compliance with the Clean Power Plan has the potential of having significant financial and operational impacts on Great Plains Energy and KCP&L; however, the ultimate financial and operational consequences to Great Plains Energy and KCP&L cannot be determined until the state plans to implement the Clean Power Plan are known. Several lawsuits have been filed challenging the Clean Power Plan.

The Companies are subject to existing renewable energy standards in Missouri. Management believes that national renewable energy standards are also possible. The timing, provisions and impact of such possible future requirements, including the cost to obtain and install new equipment to achieve compliance, cannot be reasonably estimated at this time.

Clean Water Act

The Clean Water Act and associated regulations enacted by the EPA form a comprehensive program to restore and preserve water quality. Like the Clean Air Act, states are required to establish regulations and programs to address all requirements of the Clean Water Act, and have the flexibility to enact more stringent requirements. All of Great Plains Energy's and KCP&L's generating facilities, and certain of their other facilities, are subject to the Clean Water Act.

In May 2014, the EPA finalized regulations pursuant to Section 316(b) of the Clean Water Act regarding cooling water intake structures pursuant to a court approved settlement. KCP&L generation facilities with cooling water intake structures are subject to the best technology available standards based on studies completed to comply with such standards. The rule provides flexibility to work with the states to develop the best technology available to minimize aquatic species impacted by being pinned against intake screens (impingement) or drawn into cooling water systems (entrainment). Estimated costs to comply with Section 316(b) of the Clean Water Act are included in the estimated capital expenditures table above.

KCP&L holds a permit from the MDNR covering water discharge from its Hawthorn Station. The permit authorizes KCP&L to, among other things, withdraw water from the Missouri River for cooling purposes and return the heated water to the Missouri River. KCP&L has applied for a renewal of this permit and the EPA has submitted an interim objection letter regarding the allowable amount of heat that can be contained in the returned water. Until this matter is resolved, KCP&L continues to operate under its current permit. Future water permit renewals at KCP&L's Iatan Station and at GMO's Sibley and Lake Road Stations could also be impacted by the allowable amount of heat that can be contained in the returned water. Great Plains Energy and KCP&L cannot predict the outcome of these matters; however, while less significant outcomes are possible, these matters may require a reduction in generation, installation of cooling towers or other technology to cool the water, or both, any of which could have a significant impact on Great Plains Energy's and KCP&L's results of operations, financial position and cash flows.

In September 2015, the EPA finalized a revision of the technology-based effluent limitations guidelines and standards regulation to make the existing controls on discharges from steam electric power plants more stringent. The final rule sets the first federal limits on the levels of toxic metals in wastewater that can be discharged from power plants. The new requirements for existing power plants would be phased in between 2018 and 2023.

The final rule establishes new or additional requirements for wastewaters associated with the following processes and byproducts at certain KCP&L and GMO stations: flue gas desulfurization, fly ash, bottom ash, flue gas mercury control, and combustion residual leachate from landfills and surface impoundments. Estimated capital costs to comply with the final rule are included in the estimated capital expenditures table above.

Solid Waste

Solid and hazardous waste generation, storage, transportation, treatment and disposal are regulated at the federal and state levels under various laws and regulations. In December 2014, the EPA finalized regulations to regulate CCRs under the Resource Conservation and Recovery Act (RCRA) subtitle D to address the risks from the disposal of CCRs generated from the combustion of coal at electric generating facilities. The Companies use coal in generating electricity and dispose of the CCRs in both on-site facilities and facilities owned by third parties. The rule requires periodic assessments; groundwater monitoring; location restrictions; design and operating requirements; recordkeeping and notifications; and closure, among other requirements, for CCR units. The rule was promulgated in the Federal Register on April 17, 2015, and is effective six months after promulgation with various obligations effective at specified times within the rule. Estimated capital costs to comply with the CCR rule are included in the estimated capital expenditures table above. See Note 7 for information regarding an increase in Great Plains Energy's and KCP&L's AROs as a result of the CCR rule.

Remediation

Certain federal and state laws, including the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), hold current and previous owners or operators of contaminated facilities and persons who arranged for the disposal or treatment of hazardous substances liable for the cost of investigation and cleanup. CERCLA and

other laws also authorize the EPA and other agencies to issue orders compelling potentially responsible parties to clean up sites that are determined to present an actual or potential threat to human health or the environment. GMO is named as a potentially responsible party at a disposal site for polychlorinated biphenyl (PCB) contamination, and retains some environmental liability for several operations and investments it no longer owns. In addition, GMO also owns, or has acquired liabilities from companies that once owned or operated, former manufactured gas plant (MGP) sites, which are subject to the supervision of the EPA and various state environmental agencies.

At September 30, 2015, and December 31, 2014, KCP&L had \$0.3 million accrued for environmental remediation expenses, which covers ground water monitoring at a former MGP site. The amount accrued was established on an undiscounted basis and KCP&L does not currently have an estimated time frame over which the accrued amount may be paid.

In addition to the \$0.3 million accrual above, at September 30, 2015, and December 31, 2014, Great Plains Energy had \$1.4 million accrued for the future investigation and remediation of certain additional GMO identified MGP sites and retained liabilities. This estimate was based upon review of the potential costs associated with conducting investigative and remedial actions at identified sites, as well as the likelihood of whether such actions will be necessary. This estimate could change materially after further investigation, and could also be affected by the actions of environmental agencies and the financial viability of other potentially responsible parties; however, given the uncertainty of these items the possible loss or range of loss in excess of the amount accrued is not estimable.

GMO has pursued recovery of remediation costs from insurance carriers and other potentially responsible parties. As a result of a settlement with an insurance carrier, approximately \$1.4 million in insurance proceeds less an annual deductible is available to GMO to recover qualified MGP remediation expenses. GMO would seek recovery of additional remediation costs and expenses through rate increases; however, there can be no assurance that such rate increases would be granted.

13. LEGAL PROCEEDINGS

GMO Western Energy Crisis

In response to complaints of manipulation of the California energy market, The Federal Energy Regulatory Commission (FERC) issued an order in July 2001 requiring net sellers of power in the California markets from October 2, 2000, through June 20, 2001, at prices above a FERC-determined competitive market clearing price, to make refunds to net purchasers of power in the California market during that time period. Because MPS Merchant was a net purchaser of power during the refund period, it has received approximately \$8 million in refunds through settlements with certain sellers of power. MPS Merchant estimates that it is entitled to approximately \$12 million in additional refunds under the standards FERC has used in this case. FERC has stated that interest will be applied to the refunds but the amount of interest has not yet been determined.

In December 2001, various parties appealed the July 2001 FERC order to the United States Court of Appeals for the Ninth Circuit (Ninth Circuit) seeking review of a number of issues, including expansion of the refund period to include periods prior to October 2, 2000 (the Summer Period). MPS Merchant was a net seller of power during the Summer Period. On August 2, 2006, the Ninth Circuit issued an order finding, among other things, that FERC did not provide a sufficient justification for refusing to exercise its remedial authority under the Federal Power Act to determine whether market participants violated FERC-approved tariffs during the Summer Period. The court remanded the matter to FERC for further consideration. If FERC determines that MPS Merchant violated then-existing tariffs or laws during the Summer Period and that such violations affected market clearing prices in California, MPS Merchant could be found to owe refunds. Due to the uncertainties remaining in the case, the potential refund or range of potential refunds owed by MPS Merchant are not reasonably estimable.

14. RELATED PARTY TRANSACTIONS AND RELATIONSHIPS

KCP&L employees manage GMO's business and operate its facilities at cost, including GMO's 18% ownership interest in KCP&L's Iatan Nos. 1 and 2. The operating expenses and capital costs billed from KCP&L to GMO were \$45.5 million and \$137.7 million, respectively, for the three months ended and year to date September 30, 2015. These costs totaled \$41.4 million and \$128.6 million, respectively, for the three months ended and year to

date September 30, 2014. Additionally, KCP&L and GMO engage in wholesale electricity transactions with each other. KCP&L's net wholesale sales to GMO were \$0.1 million and \$0.2 million for the three months ended and year to date September 30, 2015, respectively. KCP&L's net wholesale sales to GMO were \$1.6 million and \$12.6 million for the three months ended and year to date September 30, 2014, respectively.

KCP&L and GMO are also authorized to participate in the Great Plains Energy money pool, an internal financing arrangement in which funds may be lent on a short-term basis to KCP&L and GMO from Great Plains Energy and between KCP&L and GMO. At December 31, 2014, KCP&L had a money pool payable to GMO of \$12.6 million. The following table summarizes KCP&L's related party net receivables.

	Septeml 2015		December 2014			
		(millions)				
Net receivable from GMO	\$ 4	3.6	\$	38.2		
Net receivable from Great Plains Energy		3.4		18.0		

15. DERIVATIVE INSTRUMENTS

Great Plains Energy and KCP&L are exposed to a variety of market risks including interest rates and commodity prices. Management has established risk management policies and strategies to reduce the potentially adverse effects that the volatility of the markets may have on Great Plains Energy's and KCP&L's operating results. Great Plains Energy's and KCP&L's interest rate risk management activities have included using derivative instruments to hedge against future interest rate fluctuations on anticipated debt issuances. Commodity risk management activities, including the use of certain derivative instruments, are subject to the management, direction and control of an internal commodity risk committee. Management maintains commodity price risk management strategies that use derivative instruments to reduce the effects of fluctuations in wholesale sales, fuel and purchased power expense caused by commodity price volatility.

Counterparties to commodity derivatives expose Great Plains Energy and KCP&L to credit loss in the event of nonperformance. This credit loss is limited to the cost of replacing these contracts at current market rates. Derivative instruments, excluding those instruments that qualify for the normal purchases and normal sales (NPNS) election, which are accounted for by accrual accounting, are recorded on the balance sheet at fair value as an asset or liability. Changes in the fair value of derivative instruments are recognized currently in net income unless specific hedge accounting criteria are met, except hedges that are recorded to a regulatory asset or liability consistent with KCC and MPSC regulatory orders.

Great Plains Energy and KCP&L have posted collateral, in the ordinary course of business, for the aggregate fair value of all derivative instruments with credit risk-related contingent features that are in a liability position. At September 30, 2015, Great Plains Energy and KCP&L have posted collateral in excess of the aggregate fair value of their derivative instruments; therefore, if the credit risk-related contingent features underlying these agreements were triggered, Great Plains Energy and KCP&L would not be required to post additional collateral to their counterparties. For derivative contracts with counterparties under master netting arrangements, Great Plains Energy and KCP&L can net all receivables and payables with each respective counterparty.

Commodity Risk Management

KCP&L's risk management policy uses derivative instruments to mitigate exposure to market price fluctuations for wholesale power. KCP&L has designated these financial contracts as economic hedges (non-hedging derivatives). Currently, the fair values of these instruments are recorded as derivative assets or liabilities with an offsetting entry to the consolidated statements of income. In connection with KCP&L's September 2015 MPSC rate order, future contracts will be included in a fuel recovery mechanism which allows the change in the timing of recognition to be recorded on the balance sheet in either a regulatory asset or regulatory liability. Recovery of actual costs will not impact earnings, but will impact cash flows due to the timing of the recovery mechanism.

KCP&L and GMO have Transmission Congestion Rights (TCRs) that they utilize to hedge against congestion costs and protect load prices in the Southwest Power Pool, Inc. (SPP) Integrated Marketplace, which began operations in March 2014. These financial contracts have been designated as economic hedges (non-hedging derivatives). Currently, the fair values of these instruments assigned to KCP&L's Missouri jurisdiction are recorded as derivative assets or liabilities with an offsetting entry recorded to electric revenue. In connection with KCP&L's September 2015 MPSC rate order, future TCR's will be included in a fuel recovery mechanism which allows the change in the timing of recognition to be recorded on the balance sheet in either a regulatory asset or regulatory liability.

The fair values of these instruments assigned to KCP&L's Kansas jurisdiction and GMO are recorded as derivative assets or liabilities with an offsetting entry recorded to a regulatory asset or liability. For KCP&L's Kansas jurisdiction and GMO, the settlement costs are included in their fuel recovery mechanisms. A regulatory asset or liability is recorded to reflect the change in the timing of recognition authorized by KCC and MPSC. Recovery of actual costs will not impact earnings, but will impact cash flows due to the timing of the recovery mechanism.

GMO's risk management policy uses derivative instruments to mitigate price exposure to natural gas price volatility in the market. At September 30, 2015, GMO had financial contracts in place to hedge approximately 49%, 30%, 14% and 7% of the expected on-peak natural gas generation and natural gas equivalent purchased power price exposure for the remainder of 2015, 2016, 2017 and 2018, respectively. The fair value of the portfolio will settle against actual purchases of natural gas and purchased power. GMO has designated its natural gas hedges as economic hedges (non-hedging derivatives). In connection with GMO's 2005 Missouri electric rate case, it was agreed that the settlement costs of these contracts would be recognized in fuel expense. The settlement cost is included in GMO's fuel recovery mechanism. A regulatory asset or liability is recorded to reflect the change in the timing of recognition authorized by the MPSC. Recovery of actual costs will not impact earnings, but will impact cash flows due to the timing of the recovery mechanism.

MPS Merchant, which has certain long-term natural gas contracts remaining from its former non-regulated trading operations, manages the daily delivery of its remaining contractual commitments with economic hedges (non-hedging derivatives) to reduce its exposure to changes in market prices. Within the trading portfolio, MPS Merchant takes certain positions to hedge physical sale or purchase contracts. MPS Merchant records the fair value of physical trading energy contracts as derivative assets or liabilities with an offsetting entry to the consolidated statements of income.

The gross notional contract amount and recorded fair values of open positions for derivative instruments are summarized in the following table. The fair values of these derivatives are recorded on the consolidated balance sheets. The fair values below are gross values before netting agreements and netting of cash collateral.

		Septer	nber 3	0		Decer	nber 3	1			
		2015					2014

At September 30, 2015, and December 31, 2014, Great Plains Energy offset \$4.6 million and \$2.3 million, respectively, of cash collateral posted with counterparties against net derivative positions.

See Note 17 for information regarding amounts reclassified out of accumulated other comprehensive loss for Great Plains Energy and KCP&L.

Great Plains Energy's accumulated OCI at September 30, 2015, includes \$9.3 million that is expected to be reclassified to expenses over the next twelve months. KCP&L's accumulated OCI at September 30, 2015, includes \$8.8 million that is expected to be reclassified to expenses over the next twelve months.

The following tables summarize the amounts of gain (loss) recognized for the change in fair value of commodity contract derivatives not designated as hedging instruments for Great Plains Energy and KCP&L.

16. FAIR VALUE MEASUREMENTS

GAAP defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. GAAP establishes a fair value hierarchy, which prioritizes the inputs to valuation techniques used to measure fair value into three broad categories, giving the highest priority to quoted prices in active markets for identical assets or liabilities and lowest priority to unobservable inputs. A definition of the various levels, as well as discussion of the various measurements within the levels, is as follows:

Level 1 – Unadjusted quoted prices for identical assets or liabilities in active markets that Great Plains Energy and KCP&L have access to at the measurement date.

Level 2 – Market-based inputs for assets or liabilities that are observable (either directly or indirectly) or inputs that are not observable but are corroborated by market data.

Level 3 – Unobservable inputs, reflecting Great Plains Energy's and KCP&L's own assumptions about the assumptions market participants would use in pricing the asset or liability.

Great Plains Energy and KCP&L record cash and cash equivalents and short-term borrowings on the balance sheet at cost, which approximates fair value due to the short-term nature of these instruments.

Great Plains Energy and KCP&L record long-term debt on the balance sheet at amortized cost. The fair value of long-term debt is measured as a Level 2 liability and is based on quoted market prices, with the incremental borrowing rate for similar debt used to determine fair value if quoted market prices are not available. At September 30, 2015, the book value and fair value of Great Plains Energy's long-term debt, including current maturities, were \$3.8 billion and \$4.1 billion, respectively. At December 31, 2014, the book value and fair value of Great Plains Energy's long-term debt, including current maturities, were \$3.5 billion and \$3.8 billion, respectively. At September 30, 2015, the book value and fair value of KCP&L's long-term debt, including current maturities, were \$2.6 billion and \$2.8 billion, respectively. At December 31, 2014, the book value and fair value of KCP&L's long-term debt, including current maturities, were \$2.3 billion and \$2.6 billion, respectively.

The following tables include Great Plains Energy's and KCP&L's balances of financial assets and liabilities measured at fair value on a recurring basis. The fair values below are gross values before netting arrangements and netting of cash collateral.

⁽a) Fair value is based on quoted market prices of the investments held by the fund and/or valuation models.

⁽b) Fair value is based on quoted market prices of the investments held by the trust. Debt securities classified as Level 2 are comprised of corporate bonds, U.S. Agency, state and local obligations, and other asset-backed securities.

⁽c) The fair value of derivative instruments is estimated using market quotes, over-the-counter forward price and volatility curves and correlations among fuel prices, net of estimated credit risk. Derivative instruments classified as Level 1 represent exchange traded derivative instruments. Derivative instruments classified as Level 2 represent non-exchange traded derivative instruments traded in

over-the-counter markets. Derivative instruments classified as Level 3 represent non-exchange traded derivatives traded in over-the-counter markets for which observable market data is not available to corroborate the valuation inputs and TCRs valued at the most recent auction price in the SPP Integrated Marketplace.

(d) Fair value is based on quoted market prices for equity securities and Net Asset Value (NAV) per share for fixed income funds. The fixed income fund invests primarily in intermediate and long-term debt securities, can be redeemed immediately and is not subject to any restrictions on redemptions.

The following tables reconcile the beginning and ending balances for all Level 3 assets and liabilities measured at fair value on a recurring basis.

19. SEGMENTS AND RELATED INFORMATION

Great Plains Energy has one reportable segment based on its method of internal reporting, which segregates reportable segments based on products and services, management responsibility and regulation. The one reportable business segment is electric utility, consisting of KCP&L, GMO's regulated utility operations and GMO Receivables Company. Other includes GMO activity other than its regulated utility operations, GPETHC and unallocated corporate charges. The summary of significant accounting policies applies to the reportable segment. Segment performance is evaluated based on net income.

The following tables reflect summarized financial information concerning Great Plains Energy's reportable segment.

Three Months Ended September 30, 2015	Electric Utility			Other Eliminations				eat Plains Energy

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GREAT PLAINS ENERGY INCORPORATED

EXECUTIVE SUMMARY

Description of Business

Great Plains Energy is a public utility holding company and does not own or operate any significant assets other than the stock of its subsidiaries.

Great Plains Energy's sole reportable business segment is electric utility. Electric utility consists of KCP&L, a regulated utility, GMO's regulated utility operations, which include its Missouri Public Service and St. Joseph Light & Power divisions, and GMO Receivables Company. Electric utility has approximately 6,600 MWs of generating capacity and engages in the generation, transmission, distribution and sale of electricity to approximately 844,200 customers in the states of Missouri and Kansas. Electric utility's retail electricity rates are comparable to the national average of investor-owned utilities.

Great Plains Energy's corporate and other activities not included in the sole reportable business segment includes GMO activity other than its regulated utility operations, GPETHC and unallocated corporate charges.

Earnings Overview

Great Plains Energy's earnings available for common shareholders for the three months ended September 30, 2015, decreased to \$126.4 million or \$0.82 per share from \$147.0 million or \$0.95 per share for the same period in 2014 driven by:

- a \$21.2 million increase in gross margin driven by warmer weather; recovery of program costs for energy efficiency programs under the Missouri Energy Efficiency Investment Act (MEEIA) and recovery of renewable energy costs under the Missouri Renewable Energy Standard Rate Adjustment Mechanism (RESRAM), both of which have a direct offset in utility operating and maintenance expense; partially offset by lower wholesale margins at KCP&L in Missouri, where there was no fuel recovery mechanism;
- an \$18.4 million increase in utility operating and maintenance expense driven by an increase in program credits for energy efficiency
 programs under MEEIA and amortization of deferred renewable energy costs under RESRAM, both of which have a direct offset in
 revenue; an increase in Wolf Creek operating and maintenance expenses and an increase in distribution operating and maintenance
 expenses;
- a \$5.8 million increase in depreciation and amortization expense driven by capital additions;
- a \$4.5 million decrease in non-operating income driven by a decrease in the equity component of AFUDC;
- a \$7.4 million increase in interest charges primarily due to lower interest expense in 2014 related to the release of uncertain tax positions and a decrease in the debt component of AFUDC; and
- a \$3.9 million increase in income tax expense primarily driven by income tax benefits in 2014 related to the release of uncertain tax positions partially offset by decreased pre-tax income.

Great Plains Energy's earnings available for common shareholders year to date September 30, 2015, decreased to \$188.9 million or \$1.22 per share from \$222.1 million or \$1.44 per share for the same period in 2014 driven by:

• a \$14.3 million increase in gross margin driven by new retail rates; recovery of program costs for energy efficiency programs under MEEIA and recovery of renewable energy costs under RESRAM, both of which have a direct offset in utility operating and maintenance expense; partially offset by lower wholesale margins at KCP&L in Missouri, where there was no fuel recovery mechanism, higher transmission expense and milder weather.

- a \$9.2 million increase in utility operating and maintenance expenses primarily driven by an increase in program costs for energy efficiency programs under MEEIA and amortization of deferred renewable energy costs under RESRAM, both of which have a direct offset in revenue, partially offset by a decrease in Wolf Creek operating and maintenance expenses primarily due to decreased refueling outage amortization and a planned mid-cycle maintenance outage in 2014;
- a \$19.0 million increase in depreciation and amortization expense driven by capital additions;
- a \$9.7 million decrease in non-operating income driven by a decrease in the equity component of AFUDC; and
- a \$7.0 million increase in interest charges primarily due to lower interest expense in 2014 related to the release of uncertain tax positions and a decrease in the debt component of AFUDC.

Gross margin is a financial measure that is not calculated in accordance with GAAP. See the explanation of gross margin and the reconciliation to GAAP operating revenues under Great Plains Energy's Results of Operations for further information.

For additional information regarding the change in earnings, refer to the Great Plains Energy Results of Operations and the Electric Utility Results of Operations sections within this Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A).

Regulatory Proceedings

See Note 5 to the consolidated financial statements for information regarding regulatory proceedings.

Impact of Recently Issued Accounting Standards

See Note 1 to the consolidated financial statements for information regarding the impact of recently issued accounting standards.

Wolf Creek Mid-Cycle Maintenance Outage and Refueling Outage

Wolf Creek's latest refueling outage began on February 28, 2015, and ended on May 3, 2015. Wolf Creek had a mid-cycle maintenance outage that began on March 8, 2014, and ended on May 13, 2014. Wolf Creek's next refueling outage is planned to begin in the third quarter of 2016.

ENVIRONMENTAL MATTERS

See Note 12 to the consolidated financial statements for information regarding environmental matters.

RELATED PARTY TRANSACTIONS

See Note 14 to the consolidated financial statements for information regarding related party transactions.

GREAT PLAINS ENERGY RESULTS OF OPERATIONS

The following table summarizes Great Plains Energy's comparative results of operations.

		Three Months Ended September 30					to Date mber 30		
		2015		2014	2015			2014

⁽a) Gross margin is a non-GAAP financial measure. See explanation of gross margin below.

Three Months Ended September 30, 2015, Compared to September 30, 2014

Great Plains Energy's earnings available for common shareholders for the three months ended September 30, 2015, decreased to \$126.4 million or \$0.82 per share from \$147.0 million or \$0.95 per share for the same period in 2014.

Electric utility's net income decreased \$11.2 million for the three months ended September 30, 2015, compared to the same period in 2014 due to:

- a \$21.2 million increase in gross margin driven by:
 - an estimated \$22 million increase due to warmer weather driven by an 18% increase in cooling degree days;
 - a \$5.2 million increase for recovery of program costs for energy efficiency programs under MEEIA, which have a direct offset
 in utility operating and maintenance expense, primarily due to the implementation of KCP&L's MEEIA programs in August
 2014;
 - a \$2.2 million increase for recovery of renewable energy costs under RESRAM, which have a direct offset in utility operating and maintenance expense; and
 - an estimated \$5 million decrease due to lower wholesale margins at KCP&L in Missouri, where there was no fuel recovery mechanism.
- a \$21.9 million increase in other operating expenses primarily due to:
 - a \$5.2 million increase in program costs for energy efficiency programs under MEEIA, which have a direct offset in revenue, primarily due to the implementation of KCP&L's MEEIA programs in August 2014;
 - a \$2.2 million increase in amortization of deferred renewable energy costs under RESRAM, which have a direct offset in revenue;
 - a \$2.3 million increase in Wolf Creek operating and maintenance expenses;

- a \$2.3 million increase in distribution operating and maintenance expenses; and
- a \$2.2 million increase in general taxes driven by higher property taxes.
- a \$5.8 million increase in depreciation and amortization expense due to capital additions;
- a \$3.2 million decrease in non-operating income and expenses driven by a \$3.9 million decrease in the equity component of AFUDC primarily due to a lower average construction work in progress in 2015 due to environmental upgrades at KCP&L's La Cygne Station being placed into service; and
- a \$4.0 million increase in interest charges primarily due to a \$2.4 million decrease in the debt component of AFUDC.

Great Plains Energy's corporate and other activities loss increased \$9.4 million for the three months ended September 30, 2015, compared to the same period in 2014 primarily due to the release of uncertain tax positions related to former GMO non-regulated operations in the third quarter of 2014 which resulted in:

- \$2.1 million lower after-tax interest expense in 2014; and
- \$6.1 million of income tax benefits in 2014.

Year to Date September 30, 2015, Compared to September 30, 2014

Great Plains Energy's earnings available for common shareholders year to date September 30, 2015, decreased to \$188.9 million or \$1.22 per share from \$222.1 million or \$1.44 per share for the same period in 2014.

Electric utility's net income decreased \$24.7 million year to date September 30, 2015, compared to the same period in 2014 due to:

- a \$14.3 million increase in gross margin driven by:
 - an estimated \$7 million increase due to new retail rates in KCP&L Kansas effective July 25, 2014;
 - a \$16.7 million increase for recovery of program costs for energy efficiency programs under MEEIA, which have a direct
 offset in utility operating and maintenance expense, primarily due to the implementation of KCP&L's MEEIA programs in
 August 2014;
 - a \$5.8 million increase for recovery of renewable energy costs under RESRAM, which have a direct offset in utility operating and maintenance expense;
 - an estimated \$19 million decrease due to lower wholesale margins partially offset by an estimated \$14 million due to lower fuel and purchase power expense at KCP&L in Missouri, where there was no fuel recovery mechanism;
 - an estimated \$6 million decrease due to higher transmission expense; and
 - an estimated \$5 million decrease due to weather driven by a 13% decrease in heating degree days in the first quarter of 2015
 and a 15% decrease in cooling degree days in the second quarter of 2015 partially offset by an 18% increase in cooling degree
 days in the third quarter of 2015.
- a \$14.0 million increase in other operating expenses primarily due to:
 - a \$16.7 million increase in program costs for energy efficiency programs under MEEIA, which have a direct offset in revenue, primarily due to the implementation of KCP&L's MEEIA programs in August 2014;
 - a \$5.8 million increase in amortization of deferred renewable energy costs under RESRAM, which have a direct offset in revenue;
 - a \$3.7 million increase in general taxes driven by higher property taxes; and
 - a \$12.2 million decrease in Wolf Creek operating and maintenance expenses primarily due to decreased refueling outage amortization of \$4.5 million and \$8.7 million from a planned mid-cycle maintenance outage in 2014;

- a \$19.0 million increase in depreciation and amortization expense due to capital additions;
- an \$8.6 million decrease in non-operating income and expenses driven by a \$9.4 million decrease in the equity component of AFUDC primarily due to a lower average construction work in progress in 2015 due to environmental upgrades at KCP&L's La Cygne Station being placed into service;
- a \$4.2 million increase in interest charges primarily due to a \$5.7 million decrease in the debt component of AFUDC; and
- a \$6.8 million decrease in income tax expense primarily driven by decreased pre-tax income.

Great Plains Energy's corporate and other activities loss increased \$8.5 million year to date September 30, 2015, compared to the same period in 2014 primarily due to the release of uncertain tax positions related to former GMO non-regulated operations in the third quarter of 2014 which resulted in:

- \$2.1 million lower after-tax interest expense in 2014; and
- \$6.1 million of income tax benefits in 2014.

Gross Margin

Gross margin is a financial measure that is not calculated in accordance with GAAP. Gross margin, as used by Great Plains Energy and KCP&L, is defined as operating revenues less fuel, purchased power and transmission. Expenses for fuel, purchased power and transmission, offset by wholesale sales margin, are subject to recovery through cost adjustment mechanisms, except for KCP&L's Missouri retail operations. As a result, operating revenues increase or decrease in relation to a significant portion of these expenses. Management believes that gross margin provides a more meaningful basis for evaluating electric utility's operations across periods than operating revenues because gross margin excludes the revenue effect of fluctuations in these expenses. Gross margin is used internally to measure performance against budget and in reports for management and the Board. The Companies' definition of gross margin may differ from similar terms used by other companies.

ELECTRIC UTILITY RESULTS OF OPERATIONS

The following table summarizes the electric utility segment results of operations.

	Three Months Ended September 30			Year to Da September				
	2015		2014		2015		2014	
			(mill	lions)				
Operating revenues	\$ 781.4	\$	782.5	\$	1,939.5	\$	2,016.0

Fuel	(332.0)		(392.9)	(15)				
Purchased power	(146.3)		(185.7)	(21)				
Transmission	(65.1)		(55.6)	17				
Gross margin (a)	\$ 1,396.1	\$	1,381.8	1				

⁽a) Gross margin is a non-GAAP financial measure. See explanation of gross margin under Great Plains Energy's Results of Operations.

⁽b) Consists of recovery of program costs of \$28.3 million and \$11.6 million year to date September 30, 2015, and 2014, respectively, that have a direct offset in utility operating and maintenance expenses and recovery of throughput disincentive of \$3.1 million and \$5.2 million year to date September 30, 2015, and 2014, respectively.

Electric utility's gross margin increased \$21.2 million for the three months ended September 30, 2015, compared to the same period in 2014 driven by:

- an estimated \$22 million increase due to weather driven by an 18% increase in cooling degree days;
- a \$5.2 million increase for recovery of program costs for energy efficiency programs under MEEIA, which have a direct offset in utility operating and maintenance expense, primarily due to the implementation of KCP&L's MEEIA programs in August 2014;
- a \$2.2 million increase for recovery of renewable energy costs under RESRAM, which have a direct offset in utility operating and maintenance expense; and
- an estimated \$5 million decrease due to lower wholesale margins at KCP&L in Missouri, where there was no fuel recovery mechanism.

Electric utility's gross margin increased \$14.3 million year to date September 30, 2015, compared to the same period in 2014 driven by:

- an estimated \$7 million increase due to new retail rates in KCP&L Kansas effective July 25, 2014;
- a \$16.7 million increase for recovery of program costs for energy efficiency programs under MEEIA, which have a direct offset in utility operating and maintenance expense, primarily due to the implementation of KCP&L's MEEIA programs in August 2014;
- a \$5.8 million increase for recovery of renewable energy costs under RESRAM, which have a direct offset in utility operating and maintenance expense;
- an estimated \$19 million decrease due to lower wholesale margins partially offset by an estimated \$14 million due to lower fuel and purchase power expense at KCP&L in Missouri, where there was no fuel recovery mechanism;
- an estimated \$6 million decrease due to higher transmission expense; and
- an estimated \$5 million decrease due to weather driven by a 13% decrease in heating degree days in the first quarter of 2015 and a 15% decrease in cooling degree days in the second quarter of 2015 partially offset by an 18% increase in cooling degree days in the third quarter of 2015.

Electric Utility Other Operating Expenses (including utility operating and maintenance expenses, general taxes and other)
Electric utility's other operating expenses increased \$21.9 million for the three months ended September 30, 2015, compared to the same period in 2014 primarily due to:

- a \$5.2 million increase in program costs for energy efficiency programs under MEEIA, which have a direct offset in revenue, primarily due to the implementation of KCP&L's MEEIA programs in August 2014;
- a \$2.2 million increase in amortization of deferred renewable energy costs under RESRAM, which have a direct offset in revenue;
- a \$2.3 million increase in Wolf Creek operating and maintenance expenses;
- a \$2.3 million increase in distribution operating and maintenance expenses; and
- a \$2.2 million increase in general taxes driven by higher property taxes.

Electric utility's other operating expenses increased \$14.0 million year to date September 30, 2015, compared to the same period in 2014 primarily due to:

- a \$16.7 million increase in program costs for energy efficiency programs under MEEIA, which have a direct offset in revenue, primarily due to the implementation of KCP&L's MEEIA programs in August 2014;
- a \$5.8 million increase in amortization of deferred renewable energy costs under RESRAM, which have a direct offset in revenue;

- a \$3.7 million increase in general taxes driven by higher property taxes; and
- a \$12.2 million decrease in Wolf Creek operating and maintenance expenses primarily due to decreased refueling outage amortization of \$4.5 million and \$8.7 million from a planned mid-cycle maintenance outage in 2014.

Electric Utility Depreciation and Amortization

Electric utility's depreciation and amortization increased \$5.8 million and \$19.0 million, respectively, for the three months ended and year to date September 30, 2015, compared to the same periods in 2014 due to capital additions.

Electric Utility Non-Operating Income and Expenses

Electric utility's non-operating income and expenses decreased \$3.2 million and \$8.6 million, respectively, for the three months ended and year to date September 30, 2015, compared to the same periods in 2014 due to a \$3.9 million and \$9.4 million, respectively, decrease in the equity component of AFUDC primarily due to a lower average construction work in progress in 2015 due to environmental upgrades at KCP&L's La Cygne Station being placed into service.

Electric Utility Interest Charges

Electric utility's interest charges increased \$4.0 million and \$4.2 million, respectively, for the three months ended and year to date September 30, 2015, compared to the same periods in 2014 due to a \$2.4 million and \$5.7 million, respectively, decrease in the debt component of AFUDC.

Electric Utility Income Tax Expense

Electric utility's income tax expense decreased \$6.8 million year to date September 30, 2015, compared to the same period in 2014 primarily due to decreased pre-tax income.

GREAT PLAINS ENERGY SIGNIFICANT BALANCE SHEET CHANGES

(September 30, 2015 compared to December 31, 2014)

- Great Plains Energy's net utility plant in service increased \$913.5 million and construction work in progress decreased \$592.9 million primarily due to environmental upgrades at KCP&L's La Cygne Station being placed into service.
- Great Plains Energy's commercial paper decreased \$219.2 million primarily due to repayment with a portion of the proceeds from KCP&L's August 2015 issuance of \$350.0 million of 3.65% Senior Notes.
- Great Plains Energy's current maturities of long-term debt decreased \$14.0 million due to the repayment of KCP&L's \$14.0 million secured Series 2005 EIRR bonds at maturity in March 2015.
- Great Plains Energy's accounts payable decreased \$157.9 million primarily due to the timing of cash payments.
- Great Plains Energy's accrued taxes increased \$88.3 million primarily due to the timing of property tax payments.
- Great Plains Energy's asset retirement obligations increased \$78.9 million primarily due to new asset retirement obligations related to CCR regulations. See Note 7 to the consolidated financial statements for additional information.
- Great Plains Energy's long-term debt increased \$275.5 million due to the August 2015 issuance, at a discount, of KCP&L's \$350.0 million of 3.65% Senior Notes partially offset by the September 2015 purchase in lieu of redemption of \$71.9 million of KCP&L's EIRR bonds.

CAPITAL REQUIREMENTS AND LIQUIDITY

Great Plains Energy operates through its subsidiaries and has no material assets other than the stock of its subsidiaries. Great Plains Energy's ability to make payments on its debt securities and its ability to pay dividends is

dependent on its receipt of dividends or other distributions from its subsidiaries, proceeds from the issuance of its securities and borrowing under its revolving credit facility.

Great Plains Energy's capital requirements are principally comprised of debt maturities and electric utility's construction and other capital expenditures. These items as well as additional cash and capital requirements are discussed below.

Great Plains Energy's liquid resources at September 30, 2015, consisted of \$11.0 million of cash and cash equivalents on hand and \$1,093.5 million of unused bank lines of credit. The unused lines consisted of \$187.8 million from Great Plains Energy's revolving credit facility, \$515.2 million from KCP&L's credit facilities and \$390.5 million from GMO's credit facilities. See Note 10 to the consolidated financial statements for more information regarding the revolving credit facilities. Generally, Great Plains Energy uses these liquid resources to meet its day-to-day cash flow requirements, and from time to time issues equity and/or long-term debt to repay short-term debt or increase cash balances.

Great Plains Energy intends to meet day-to-day cash flow requirements including interest payments, retirement of maturing debt, construction requirements, dividends and pension benefit plan funding requirements with a combination of internally generated funds and proceeds from short-term debt. From time to time, Great Plains Energy issues equity and/or long-term debt to repay short-term debt or increase cash balances. Great Plains Energy's intention to meet a portion of these requirements with internally generated funds may be impacted by the effect of inflation on operating expenses, the level of MWh sales, regulatory actions, compliance with environmental regulations and the availability of generating units. In addition, Great Plains Energy may issue equity, equity-linked securities and/or debt to finance growth.

Cash Flows from Operating Activities

Great Plains Energy generated positive cash flows from operating activities for the periods presented. The \$45.3 million increase in cash flows from operating activities for Great Plains Energy year to date September 30, 2015, compared to the same period in 2014 was primarily due to a \$36.6 million decrease in solar rebates paid to customers. Other changes in working capital are detailed in Note 2 to the consolidated financial statements. The individual components of working capital vary with normal business cycles and operations.

Cash Flows from Investing Activities

Great Plains Energy's cash used for investing activities varies with the timing of utility capital expenditures and purchases of investments and nonutility property. Investing activities are offset by proceeds from the sale of properties and insurance recoveries.

In January 2014, KCP&L and GMO completed the sale of two SPP-approved regional transmission projects, at cost, to Transource Missouri, LLC for cash proceeds of \$37.7 million.

Cash Flows from Financing Activities

Great Plains Energy's cash flows from financing activities year to date September 30, 2015, reflect KCP&L's issuance, at a discount, of \$350.0 million of 3.65% Senior Notes that mature in 2025, with the proceeds used to purchase in lieu of redemption \$71.9 million of EIRR bonds and repay short-term borrowings.

Financing Authorization

Under stipulations with the MPSC and KCC, Great Plains Energy and KCP&L maintain common equity at not less than 30% and 35%, respectively, of total capitalization (including only the amount of short-term debt in excess of the amount of construction work in progress). KCP&L's long-term financing activities are subject to the authorization of the MPSC. In July 2014, the MPSC authorized KCP&L to issue up to \$350.0 million of long-term debt and enter into interest rate hedging instruments in connection with such debt through June 30, 2016. At September 30, 2015, KCP&L had utilized all of this authorization.

In November 2014, FERC authorized KCP&L to have outstanding at any one time up to a total of \$1.0 billion in short-term debt instruments through December 2016, conditioned on KCP&L's borrowing costs not exceeding the

greater of: (i) 2.25% over LIBOR; (ii) 1.75% over the prime rate or federal funds rate; or (iii) 2.25% over the A2/P-2 nonfinancial commercial paper rate most recently published by the Federal Reserve at the time of the borrowing. The authorization is subject to four restrictions: (i) proceeds of debt backed by utility assets must be used for utility purposes; (ii) if any utility assets that secure authorized debt are divested or spun off, the debt must follow the assets and also be divested or spun off, (iii) if any proceeds of the authorized debt are used for non-utility purposes, the debt must follow the non-utility assets (specifically, if the non-utility assets are divested or spun off, then a proportionate share of the debt must follow the divested or spun off non-utility assets); and (iv) if utility assets financed by the authorized short-term debt are divested or spun off to another entity, a proportionate share of the debt must also be divested or spun off. At September 30, 2015, there was \$917.9 million available under this authorization.

In January 2014, FERC authorized GMO to have outstanding at any one time up to a total of \$750.0 million in short-term debt instruments through March 2016, conditioned on GMO's borrowing costs not exceeding the greater of 2.25% over LIBOR or 1.75% over the prime rate or federal funds rate, as applicable, and subject to the same four restrictions as the KCP&L FERC short-term authorization discussed in the preceding paragraph. At September 30, 2015, there was \$693.0 million available under this authorization.

KCP&L and GMO are also authorized by FERC to participate in the Great Plains Energy money pool, an internal financing arrangement in which funds may be lent on a short-term basis to KCP&L and GMO. At September 30, 2015, GMO had an outstanding payable to Great Plains Energy under the money pool of \$3.4 million.

Debt Agreements

See Note 10 to the consolidated financial statements for information regarding revolving credit facilities.

Significant Financing Activities

Great Plains Energy has an effective shelf registration statement for the sale of unspecified amounts of securities with the SEC that was filed and became effective in March 2015 and expires in March 2018.

KCP&L has an effective shelf registration statement providing for the sale of unspecified amounts of investment grade notes and general mortgage bonds with the SEC that was filed and became effective in March 2015 and expires in March 2018.

In August 2015, KCP&L issued, at a discount, \$350.0 million of 3.65% unsecured Senior Notes, maturing in 2025.

Pensions

The Company incurs significant costs in providing defined benefit plans for substantially all active and inactive employees of KCP&L and GMO and its 47% ownership share of WCNOC's defined benefit plans. Funding of the plans follows legal and regulatory requirements with funding equaling or exceeding the minimum requirements of ERISA.

Year to date September 30, 2015, the Company contributed \$29.5 million to the pension plans and expects to contribute an additional \$49.4 million in 2015 to satisfy the minimum ERISA funding requirements and the MPSC and KCC rate orders, the majority of which is expected to be paid by KCP&L.

Additionally, the Company provides post-retirement health and life insurance benefits for certain retired employees and expects to make benefit contributions of \$10.2 million under the provisions of these plans in 2015, the majority of which is expected to be paid by KCP&L.

Management believes the Company has adequate access to capital resources through cash flows from operations or through existing lines of credit to support these funding requirements.

KANSAS CITY POWER & LIGHT COMPANY

MANAGEMENT'S NARRATIVE ANALYSIS OF RESULTS OF OPERATIONS

The following table summarizes KCP&L's consolidated comparative results of operations.

		o Date 1ber 30
	2015	2014
	(mill	ions)
Operating revenues	\$ 1,314.1	\$ 1,363.9
Fuel	(237.3)	(289.0)
Purchased power	(73.4)	(86.8)
Transmission	(42.3)	(35.1)
Gross margin (a)	961.1	953.0
Other operating expenses	(490.7)	(492.4)
Depreciation and amortization	(175.0)	(157.7)
Operating income	295.4	302.9
Non-operating income and expenses	0.6	9.3
Interest charges	(100.4)	(92.8)
Income tax expense	(68.7)	(72.9)
Net income	\$ 126.9	\$ 146.5

⁽a) Gross margin is a non-GAAP financial measure. See explanation of gross margin under Great Plains Energy's Results of Operations.

KCP&L Gross Margin and MWh Sales

The following table summarizes KCP&L's gross margin and MWhs sold.

	Revenue	s and	Costs	%	MWhs	Sold	%	
Year to Date September 30	2015		2014	Change ^(c)	2015	2014	Change

Operating revenues	 1,314.1		1,363.9	(4)	15,779	17,603	(10)	
Fuel	(237.3)		(289.0)	(18)				
Purchased power	(73.4)		(86.8)	(15)				
Transmission	(42.3)		(35.1)	20				
Gross margin (a)	\$ 961.1	\$	953.0	1				

⁽a) Gross margin is a non-GAAP financial measure. See explanation of gross margin under Great Plains Energy's Results of Operations.

⁽b) Consists of recovery of program costs of \$12.8 million and \$2.3 million year to date September 30, 2015 and 2014, respectively that have a direct offset in operating and maintenance expenses and recovery of throughput disincentive of \$3.3 million and \$1.4 million year to date September 30, 2015 and 2014, respectively.

⁽c) N/M - not meaningful

KCP&L's gross margin increased \$8.1 million year to date September 30, 2015, compared to the same period in 2014 primarily due to:

- a \$10.5 million increase for recovery of program costs for energy efficiency programs under MEEIA, which have a direct offset in operating and maintenance expense, due to the implementation of KCP&L's MEEIA programs in August 2014;
- an estimated \$7 million increase due to new retail rates in KCP&L Kansas effective July 25, 2014; and
- an estimated \$19 million decrease due to lower wholesale margins partially offset by an estimated \$14 million due to lower fuel and purchase power expense at KCP&L in Missouri, where there was no fuel recovery mechanism; and
- an estimated \$3 million decrease due to higher transmission expense.

KCP&L Other Operating Expenses (including operating and maintenance expenses, general taxes and other)

KCP&L's other operating expenses decreased \$1.7 million year to date September 30, 2015, compared to the same period in 2014 primarily due to:

- a \$12.2 million decrease in Wolf Creek operating and maintenance expenses primarily due to decreased refueling outage amortization of \$4.5 million and \$8.7 million from a planned mid-cycle maintenance outage in 2014; and
- a \$10.5 million increase in program costs for energy efficiency programs under MEEIA, which have a direct offset in revenue, primarily due to the implementation of KCP&L's MEEIA programs in August 2014.

KCP&L Depreciation and Amortization

KCP&L's depreciation and amortization expense increased \$17.3 million year to date September 30, 2015, compared to the same period in 2014 due to capital additions.

KCP&L Non-Operating Income and Expenses

KCP&L's non-operating income and expenses decreased \$8.7 million year to date September 30, 2015, compared to the same period in 2014 due to a decrease in the equity component of AFUDC.

Electric Utility Interest Charges

KCP&L's interest charges increased \$7.6 million year to date September 30, 2015, compared to the same period in 2014 due to a decrease in the debt component of AFUDC.

Electric Utility Income Tax Expense

KCP&L's income tax expense decreased \$4.2 million year to date September 30, 2015, compared to the same period in 2014 primarily due to decreased pre-tax income.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Great Plains Energy and KCP&L are exposed to market risks associated with commodity price and supply, interest rates and equity prices. Market risks are handled in accordance with established policies, which may include entering into various derivative transactions. In the normal course of business, Great Plains Energy and KCP&L also face risks that are either non-financial or non-quantifiable. Such risks principally include business, legal, compliance, operational and credit risks and are discussed elsewhere in this document as well as in the 2014 Form 10-K and therefore are not represented here.

Great Plains Energy's and KCP&L's interim period disclosures about market risk included in quarterly reports on Form 10-Q address material changes, if any, from the most recently filed annual report on Form 10-K. Therefore, these interim period disclosures should be read in connection with Item 7A Quantitative and Qualitative Disclosures About Market Risk included in the 2014 Form 10-K of each of Great Plains Energy and KCP&L, incorporated herein by reference.

MPS Merchant is exposed to credit risk. Credit risk is measured by the loss that would be recorded if counterparties failed to perform pursuant to the terms of the contractual obligations less the value of any collateral held. MPS Merchant's counterparties are not externally rated. Credit exposure to counterparties at September 30, 2015, was \$6.6 million.

ITEM 4. CONTROLS AND PROCEDURES

GREAT PLAINS ENERGY

Disclosure Controls and Procedures

Great Plains Energy carried out an evaluation of its disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)). This evaluation was conducted under the supervision, and with the participation, of Great Plains Energy's management, including the chief executive officer and chief financial officer, and Great Plains Energy's disclosure committee. Based upon this evaluation, the chief executive officer and chief financial officer of Great Plains Energy have concluded as of the end of the period covered by this report that the disclosure controls and procedures of Great Plains Energy were effective at a reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There has been no change in Great Plains Energy's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during the quarterly period ended September 30, 2015, that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

KCP&L

Disclosure Controls and Procedures

KCP&L carried out an evaluation of its disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Exchange Act). This evaluation was conducted under the supervision, and with the participation, of KCP&L's management, including the chief executive officer and chief financial officer, and KCP&L's disclosure committee. Based upon this evaluation, the chief executive officer and chief financial officer of KCP&L have concluded as of the end of the period covered by this report that the disclosure controls and procedures of KCP&L were effective at a reasonable assurance level.

Changes in Internal Control Over Financial Reporting

There has been no change in KCP&L's internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) of the Exchange Act) that occurred during the quarterly period ended September 30, 2015, that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Other Proceedings

The Companies are parties to various lawsuits and regulatory proceedings in the ordinary course of their respective businesses. For information regarding material lawsuits and proceedings, see Notes 5, 12 and 13 to the consolidated financial statements. Such information is incorporated herein by reference.

ITEM 1A. RISK FACTORS

Actual results in future periods for Great Plains Energy and KCP&L could differ materially from historical results and the forward-looking statements contained in this report. The Companies' business is influenced by many factors that are difficult to predict, involve uncertainties that may materially affect actual results and are often beyond their control. Additional risks and uncertainties not presently known or that the Companies' management currently believes to be immaterial may also adversely affect the Companies. Factors that might cause or contribute

to such differences include, but are not limited to, those discussed in Item 1A Risk Factors included in the 2014 Form 10-K for each of Great Plains Energy and KCP&L. There have been no material changes with regard to those risk factors. This information, as well as the other information included in this report and in the other documents filed with the SEC, should be carefully considered before making an investment in the securities of Great Plains Energy or KCP&L. Risk factors of KCP&L are also risk factors of Great Plains Energy.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Investors should note that Great Plains Energy and KCP&L announce material financial information in SEC filings, press releases and public conference calls. Based on guidance from the SEC, Great Plains Energy and KCP&L may use the Investor Relations section of Great Plains Energy's website (www.greatplainsenergy.com) to communicate with investors about Great Plains Energy and KCP&L. It is possible that the financial and other information Great Plains Energy and KCP&L post there could be deemed to be material information. The information on the website is not part of this document.

(Steven P. Busser)

(Principal Accounting Officer)

I, Terry Bassham, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Great Plains Energy Incorporated;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

Terry Bassham

Chairman, President and Chief Executive Officer

I, Kevin E. Bryant, certify that:

- 1. I have reviewed this quarterly report on Form 10-Q of Great Plains Energy Incorporated;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
